DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 6/12/2002 have been fully considered and are persuasive. Accordingly, the rejection detailed in the previous Office Action is withdrawn. A new detailed action follows.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-3, 5-9, and 16-20 drawn to a packaging machine and method for packaging classified in class 53, subclass 443.
 - II. Claims 10-15, drawn to a gripping mechanism, classified in class 211.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it can be used with grippers that do not include gripper bars as recited in claims

Art Unit: 3721

10-15. The subcombination has separate utility such as for a machine for transporting items from one location to another without forming them into groups or packaging into boxes.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
